

GCE Advanced Level Psychology

Description:

The aims and objectives of the AQA GCE Advanced Psychology are to enable students to:

5 or more level 5 or above (GCSE or BTEC equivalent) including

- Demonstrate knowledge and understanding of psychological concepts, theories, research studies, research methods and ethical issues in relation to Psychology.
- Apply psychological knowledge and understanding in a range of contexts.
- Analyse, interpret and evaluate psychological concepts, theories, research studies and research methods in relation to the Psychological content.
- Evaluate therapies and treatments including in terms of their appropriateness and effectiveness.
- Develop knowledge and understanding of research methods, practical research skills and mathematical skills through study of the specification content and through ethical practical research activities, involving:
 - Designing research
 - Conducting research
 - Analysing and interpreting data

Students are introduced to Psychology by covering topics that show that we can explain human behaviour from a range of viewpoints and with an emphasis on conducting their own research wherever possible. They extend their GCSE Mathematics by applying data handling techniques learning how to understand inferential statistics. They extend their GCSE Science in Biology, in particular in how the brain works and how it is studied.

Career paths:

A qualification in Psychology provides students with opportunities to pursue careers in these fields:

- Clinical psychology
- Counselling
